Department of Civil and Environmental Engineering

Department Information
- www.ndsu.edu/ce

Undergraduate Programs of Study
- Civil Engineering (major)

Degrees Offered
- Bachelor of Science in Civil Engineering (B.S.C.E.)

Department Description
The mission of the Department of Civil and Environmental Engineering is to provide quality education to prepare nationally competitive undergraduate students for a successful career in civil and environmental engineering; to provide advanced skills and knowledge in state-of-the-art research and design in sub-areas of civil and environmental engineering for graduate students; and to provide service to the university, engineering profession, and the public.

The following program educational objectives are consistent with the university, college, and department missions. Graduates of our B.S. in Civil Engineering program are expected within a few years of graduation to:

1. Have and apply the fundamental knowledge to solve problems in the civil engineering field and/or in pursuit of graduate education.
2. Have the ability to conduct engineering design, taking into consideration the related social, economic, environmental, and public safety impacts.
3. Comprehend and adhere to ethical and professional practices, realizing the broader societal implications of civil engineering.
4. Obtain or make progress toward obtaining professional licensure, seek or assume leadership roles, and engage in life-long learning.

Civil engineering includes the planning, design, construction, maintenance, and operation of large and permanent projects of our civilization. Civil engineers are in demand wherever there are people. The major subdivisions of civil engineering at NDSU are structural, geotechnical, environmental, water resources, and transportation engineering.

Civil Engineers are responsible for such projects as bridges, buildings, dams, and other river and harbor work, municipal water supply and sanitation facilities, streets, highways, and other transportation facilities. On many projects, civil engineers work in close cooperation with engineers and scientists from other fields. The Civil Engineering program at NDSU is accredited by the Engineering Accreditation Commission of the ABET (www.abet.org (http://www.abet.org)).
