Industrial and Manufacturing Engineering

Department Information

- **Department Chair:**
  David Grewell, Ph.D.

- **Email:**
  david.grewell@ndsu.edu

- **Graduate Coordinator:**
  Yiwen Xu, Ph.D.

- **Email:**
  yiwen.xu@ndsu.edu

- **Department Location:**
  202 Civil & Industrial Engineering Building

- **Department Phone:**
  (701) 231-9818

- **Department Web Site:**
  www.ndsu.edu/ime/ (http://www.ndsu.edu/ime/)

- **Application Deadline:**
  International applications due March 1 for fall; August 15 for spring and summer. Domestic applications due one month prior to start of semester. For assistantship consideration, fall applications due March 1; limited spring openings.

- **Credential Offered:**
  Ph.D., M.S.

- **Test Requirement:**
  GRE - General

- **English Proficiency Requirements:**
  TOEFL iBT 79; IELTS 6.5

Degree Requirements

The Master of Science degree in Industrial Engineering and Management or Manufacturing Engineering requires 30 credits of graduate-level study.

- A minimum of 15 credits from *didactic IME* courses (numbered IME 601-689 and IME 700-789) are required.
- In addition, a minimum of 6 credits of *other courses* are required for funded student (no matter GTA or GRA). This part of the course credits may come from approved graduate level courses of other departments. If a student is funded by himself/herself, then the minimum requirement of other courses is 8 credits.
- A minimum of 3 credits (i.e., from three semesters) from IME *graduate seminar* (IME 790) are required for a funded student (no matter GTA or GRA). If a student is funded by himself/herself, then the minimum requirement of the graduate seminar is 1 credit.
- 6 credits of thesis (IME 798) are required towards the M.S. degree.
- All graduate students are required to submit two articles to a refereed journal or refereed conference based on their thesis research.

The Doctor of Philosophy degree requires 60 credits beyond the M.S. requirement (90 credits total).

All students admitted into the IME Ph.D. Program must pass the qualifying exam (QE). The exam will include written and oral portions. *Four topics* will be selected by the major professor with consultation with the student. In general, the exam will measure the student's basic knowledge of the fundamentals in core topics related to IME. The written and oral exams will be executed with one day of each other, typically one week before the start of fall semester. Ph.D. students are recommended taking the QE at the end of their first year.

For students who are enrolled with a M.S. degree, the course credit requirements *beyond the M.S. degree are:*

- A minimum of 15 credits from *didactic IME courses* (IME 601-689 and 700-789), with at least 9 credits from 700-level IME courses. If courses are not offered in a timeline that meet the students requirements, it is possible for waiver/substitution requests.
- A minimum of 12 credits of *other courses* are required. This part of the course credits may come from approved graduate level courses of other departments.
- A minimum 3 credits of *Graduate Seminar* (IME 790).
- A minimum of 30 credits of *dissertation* (IME 899).

For students who are enrolled with a bachelor’s degree, the course credit requirements are:
• A minimum of 30 credits from *didactic IME courses* (IME 601-689 and 700-789), with at least 9 credits from 700-level IME courses. If courses are not offered in a timeline that meet the students requirements, it is possible for waiver/substitution requests.

• A minimum of 27 credits of *other courses* are required. This part of the course credits may come from approved graduate level courses of other departments.

• Among these 57 course credits, at least 30 of them must be 700-level course. For example, if you take 9 credits of 700-level IME courses, then you need to take at least 21 credits of 700-level courses of other departments.

• A minimum 3 credits of Graduate Seminar (IME 790).

• A minimum of 30 credits of dissertation (IME 899).

For either the M.S. or Ph.D., all courses taken outside of the IME Department must be approved in advance by the student’s academic adviser. The total courses of study must be approved by the student’s academic adviser, POS (plan of study) committee, and department chair. Students completing graduate degrees within the IME Department are expected to exhibit demonstrable expertise in the core competencies of either industrial engineering or manufacturing engineering. Students whose undergraduate major is in another field may be required to include some or all of the core competencies in their graduate coursework. For further information in this regard, please consult the IME department.

Each new student must have an academic advisor and select their POS committee by the end of their 1st semester of study (see IME grad handbook for requirements). This committee will be chaired by the faculty adviser and will provide direction, advice and examination of the student’s work and achievement. All students must consult with their major advisor and submit a plan of study (POS) by the end of the second semester of study. Once approved, the POS will provide direction for the remainder of the student’s degree work.
